DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-18, drawn to a jet mixer, classified in class 366, subclass 178.1.
 - II. Claim 19, drawn to a method of mixing guar gum, classified in class 366, subclass 348.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus could be used to mix material other than guar gum, such as cement. Also, the apparatus could be used to perform a method that does not require a tapered inner nozzle and/or does not require an inwardly tapered section of the housing.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 1723

5. A telephone call was made to Molly D. McKay on 17 March 2003 to request an oral election to the above restriction requirement; however, Ms. McKay explained that her client is currently in China and suggested that a written action be mailed.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
